

BUSINESS IN WARRINGAH

The Importance Of Networking

Networking is a crucial strategy for business success. Networking is about giving people the opportunity to get to know about you and your business on a personal level. Developing networking relationships takes time but there are many benefits.

Networking enables you:

- To gather information about potential opportunities and let others know about yours.
- To become a member of a networking group which can add weight to the credibility of your skills.
- To meet other business people in an informal and relaxed environment.

Some tips for making the most of the networking event you are attending.

- Listen and ask questions. Ask the person what their business is about and listen to what they say.
- Give referrals. By listening and asking questions you will have gathered information that will enable you to refer others to the person you are speaking to.
- Exchange business cards. Always ask for two cards. One to add to your database and one to give to the person you will be referring.
- Don't spend too much time with the one person. Networking is about getting yourself known to at least 3 people at an event. Give them and yourself the opportunity to make the most of the event.
